## Plastic Free Day

We at SKBR GDC, Macherla organize **plastic free day once in every month** to show our concern towards protecting the environment from pollution due to plastic use.

On the plastic-free day we skip plastic to reduce our plastic footprint. On this day, **the students and staff don't buy anything that is made of plastic or contains plastic**. That means no plastic carry bags, no takeaway plastic cups and so on.

As part of this programme, in order to raise awareness in the surrounding colonies, the students of **SKBR GDC, Macherla** under the guidance of the **Department of Chemistry**, have initiated an activity to spread awareness against the harmful effects of **plastic on environment** and health by distributing handouts. During this programme, they also distributed cloth bags to encourage people to carry reusable cloth bags whenever they go out for shopping and deny to take plastic carry bags.

Students are distributing jute bags and motivate to avoid plastic bags
